\* Launch date of IFSL Hathaway Fund.

External Source of Economic Data: Morningstar (Accumulation - quoted price to quoted price).

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this unit class is calculated in sterling.

#### Investment commentary

##### Recent performance

Following our second-best year ever, we saw a slight consolidation/retracement afterwards and, in the six months ended 31st March 2025, our accumulation units returned minus 4.46%, following a fall in price of 11.06p and no movement in our benchmark\*.

Launched in 2002 at 50p, that class reached 236.80p at the halfway stage, reflecting annual compounding\* at 7.2% over our first 22½ years (down slightly from the 7.5% annual run rate recorded in September). We remain ahead of our peer group benchmark, the Investment Association Mixed Investment 40% - 85% Shares sector, over one year, ten years and since launch, although we clearly have ground to make up over shorter periods.

To summarize recent performance: with our long-term percentage advantage remaining very much in place, shorter periods are slowly falling in line and of course the one-year column was encouragingly ahead.

##### Investing conditions – portfolio and general developments

We are now investing against a background of a continuing unstable world security situation and a particularly difficult economic outlook: we have an incumbent in The White House who appears to be determined to pursue protectionism and tariffs.

Under this long shadow, we have seen much that we like about our holdings, with further gratifying business reports from Next and Tesco, as examples, but President Trump's proposed tariffs appear to have - very recently - hit share prices generally [and could one day hurt the businesses of some of our investees too]. The very strong advance in the portfolio last year, stalled/reversed slightly after President Trump arrived, a process which may reoccur...

At the sharp end, there has been, and continues, profound - and irrational - volatility in individual stocks: we are seeing some holdings up 8%, 10% or 12% in a week and then, abruptly, marched back down again; times like this call for great patience and concentration upon the long term.

That stance is greatly helped by the flow of dividends though, which continues completely unabated.

Equally, our fund has outperformed the stock market over the period since launch in 2002 [and is way ahead of its benchmark in that time], something which they teach at business school as being impossible [long-term] and noteworthy given our 15% - 45% in lower risk/return government bond holdings in that time; this puts the last six months - and 2022 [when we faltered] - in perspective.

Meanwhile, our cohort of quality investees continued to post mostly satisfactory business reports, although their share prices again generally lagged their owners' economic performance.

Games Workshop (tabletop war games) was one of the glamorous exceptions: its shares went up 30% in the six months, and Next (UK clothes retailing) added a further 13%; Britvic (soft drinks) provided healthy takeover proceeds, while Tesco (food retailing), retreated 7.5%.

U.S. and Hong Kong stocks [but global businesses] respectively - Somero (cement screeding) and Techtronic (electric DIY tools) - both retreated 11.5%.

Diageo (Gordon's Gin & Johnnie Walker whisky worldwide) was down 22.5%, as President Trump trained his sights on scotch whisky - a huge US import - and concerns about adverse consumer trends added to investors' nerves.

The conclusion about the last six months is clear though: a tough market period under review in terms of volatility from week to week [less so in business terms], the upsets calmed by our government bond holding, a large cash reserve, and certain holdings escaping the trend.

## IFSL HATHAWAY FUND

### AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 March 2025

#### Investment commentary (continued)

##### Outlook – what our investors may expect

We anticipate healthy business performance from almost all our investees, but we expect further turbulence. Generally, investors continue to concentrate on the very short term: hence the volatility still stalking stock markets worldwide and, for example, the feverish speculation in gold.

Meanwhile, while it might be tempting not to consider President Trump, it is slightly disturbing to look at history and the clear parallels with current events. Indeed, fifty years or so ago - albeit with most of the colourful rhetoric kept behind closed doors - President Nixon brought in a raft of draconian tariffs and measures which lit the blue touch paper of The Great Inflation of the 1970s.

The U.S. and the rest of the world took more than a decade to recover from the profoundly rising prices, and there was considerable pain and dislocation along the way; tariffs are a measure which truly hurt the imposer more than the punished.

It is disappointing then that we seem destined perhaps to go through the same process again.

So, while we continue value investing amidst the mayhem, as ever we ask unitholders to keep their expectations sharply rational; remember though, that markets always turn upwards, two or three years before economic conditions improve. Patience is always rewarded.

In closing, we again thank IFSL for their accurate administration & we look forward to reporting our annual results in the autumn, while unitholders requiring up to date prices etc., should refer to our website.

##### Glossary

\* Launch date of the IFSL Hathaway Fund.

\* A *benchmark* is a comparator fund or appropriate group of funds/index, against which a fund's performance is measured; it is used to evaluate a fund by comparing its returns over time, most usefully over the long term.

\* *Annual compounding* means that interest rate which, if uniformly applied each year over a given period, would arrive at the actual result; thus: 50p becomes 236.80p over 22.5 years at a continuous annual rate of 7.2%. Returns naturally differ widely in fact from period to period; compounding smooths the numbers, without compromising accuracy.

## **IFSL HATHAWAY FUND**

### **AUTHORISED STATUS**

IFSL Hathaway Fund (the Fund) is an authorised unit trust scheme within the meaning of the Financial Services and Markets Act 2000 and is a UCITS scheme operating under the Collective Investment Schemes Sourcebook (COLL) as issued by the Financial Conduct Authority.

### **GENERAL INFORMATION**

#### **Investment objective**

The investment objective of the Fund is to grow the value of a unitholder's capital and income, over a period of at least 5 years. This growth is expected to come from a combination of gains in investments held and income received by the Fund - such as bond interest and dividends from shares.

#### **Investment policy**

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when, across different industries and regions of the world.

The Investment Manager considers economic and market conditions, but the focus is on individual company analysis. The aim is to identify companies which show good long-term growth potential, and which appear to be undervalued given their prospects.

The Fund will invest between 40 - 85% of its portfolio in the shares of companies. There will be a bias towards enterprises that are expected to pay steady dividends; however, the Fund may occasionally invest in securities which do not pay dividends.

The Fund will invest between 15 - 60% of its portfolio in bonds, which are loans typically issued by companies, governments and other institutions. These will typically be investment grade bonds, where the issuer has a high and reliable capacity to repay the debt. However, from time to time, our operations may include sub-investment grade bonds (which can be more vulnerable to changing market conditions, but typically pay a higher rate of interest) where we judge them to be incorrectly downgraded.

The Fund may also invest in money market instruments, which are shorter term loans.

The Fund will hold cash to enable the ready settlement of liabilities and for the efficient management of the portfolio. The Fund may hold cash up to a maximum of 30%, in extreme market conditions.

#### **Assessing performance**

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Mixed investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

#### **Rights and terms attaching to each unit class**

A unit of each class represents a proportional entitlement to the assets of the Fund. The allocation of income and taxation and the rights of each unit in the event the Fund is wound up are on the same proportional basis.

#### **Taskforce on climate related financial disclosures**

A statement of the climate related financial disclosures is published on the website <https://www.ifslfunds.com/tcf-reporting>.

#### **Changes in prospectus**

There have been no significant changes since the last report.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any fund within the AFM's range, can be requested by the investor at any time.

**IFSL HATHAWAY FUND**

**DIRECTOR'S STATEMENT**

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

<sup>A</sup> The return after charges is calculated using the underlying investments bid prices.

<sup>B</sup> On 30 November 2023, The Investment Association amended the disclosure of fund charges and costs originally issued on the 2 July 2020. Consequently, we have excluded, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

<sup>C</sup> These figures have been annualised.

Operating charges are normally the same as the Ongoing Charges Figures (OCFs) and are the total expenses paid by each unit class in the period. Where it is considered unsuitable to use the total expenses paid by each unit class in the period to calculate the OCF because of material changes to the Fund's charges an estimate will be calculated instead. The OCFs disclosed in the Key Investor Information Document (KIID) (available on IFSL's website, [www.ifslfunds.com](http://www.ifslfunds.com)) give an estimate of future costs.

Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the Fund. These amounts are expressed as a percentage of the average net asset value over the period and the average units in issue for the pence per unit figures.

**IFSL HATHAWAY FUND**

**SYNTHETIC RISK AND REWARD INDICATOR** (all unit classes)

This indicator aims to give you a measure of the price movement of the Fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

### NOTES TO THE INTERIM FINANCIAL STATEMENTS

for the six month period ended 31 March 2025

#### Basis for preparation

The interim financial statements have been prepared in compliance with UK Financial Reporting Standard 102 ("FRS 102") and in accordance with the Statement of Recommended Practice ("SORP") for UK Authorised Funds issued by the Investment Association in May 2014 and amended in June 2017.

The interim financial statements are prepared in sterling, which is the functional currency of the Fund. Monetary amounts in these financial statements are rounded to the nearest pound.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

#### Accounting policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 30 September 2024 and are described in those annual financial statements.

The investments of the Fund have been valued at their fair value at 12 noon on 31 March 2025.
