## AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 March 2023

#### Performance to 31 March 2023

	Six months	<u>1 year</u>	<u>3 years</u>	<u>5 years</u>	<u>10 years</u>
IFSL Hathaway Fund	8.56%	(7.65)%	20.01%	17.88%	87.04%
IA Mixed Investment 40% - 85% Shares sector	5.31%	(4.62)%	27.12%	22.42%	66.60%
External Source of Economic Data: Morningstar (Accumulation - guoted to guoted price).					

The performance figures above are based on quoted prices and will, therefore, differ from the performance in the Comparative Table.

Capital at risk. Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up. Performance returns are based on the net asset value with distributable income reinvested and take account of all ongoing charges, but not entry charges (if applicable). The past performance of this unit class is calculated in Sterling.

#### Investment commentary

## Recent performance

We are pleased to set out below, a commentary on our recent progress and an update on the secular record, practising value investing as ever, which involves appraising securities as attractive (or not), based principally on intrinsic worth and absolute/relative valuations.

Last year's standing order appeared to be "one step forward and two back" but, in the period, our equity and bond unit trust experienced the complete opposite and posted encouraging numbers, with an 8.5% total return, reflecting a 16.41p increase in the price of Accumulation units; as ever with investing, patience earned its special reward. Launched in 2002 at 50p, Accumulation units are now at 208.22p, representing annual compounding come September - if there is no change in the meantime - at what will be just over 7% over our first 21 years.

We were ahead of our peer group benchmark in the period too: it returned 5.3% and so fell further behind – see below for the long-term picture; the relative return in the moving 1, 3 & 5 year columns is therefore currently narrowing encouragingly. Just as six months ago, we described how poor short-term results were adversely "contaminating" longer term statistics, so this time the opposite influence was appreciably the case. We are not yet back where we would like to be, but our performance since September was indeed a timely step in the right direction.

#### Investing conditions & portfolio developments - a more "normal" six months under review

On 23 March, the Bank of England raised interest rates by a quarter point, to 4.25%, following on from the other recent hikes, and they increased them again, to 4.5%, as we went to press, the general background to which we discussed last time. The world economy though, and that of the UK, remains in fair shape for now, although further storms appear to be gathering – see below.

Amidst the slightly mixed picture, our relative and absolute performances were reassuringly robust – the benefits of letting business take its course.

Underpinning that resurgence, several of our investees recently posted particularly gratifying business reports, reversing last year's trend, and a corresponding recovery in their share prices is well under way; our waiting game - always taking place in "the meanwhile" - is an increasingly comfortable one.

Two businesses which stand out are Next & Games Workshop (GAW); the former, up 40% in the period, continues to exceed all expectations in about the most hostile bear garden of all: retailing. Meanwhile, GAW continues to consolidate its unique economic value - it has now sealed a deal with Amazon, to turn "Warhammer" into films and TV shows; licensing revenues are currently less than 10% of turnover for the business but, feeding straight into profits, they may now produce some mouth-watering cash flows.

Such profits might dry up of course and, like all things of this nature, the process could cannibalize the core business, but GAW has a never-ending global supply of newly minted adolescents to consume its main product; its shares were up 65% in the half year and GAW now has a market capitalization larger than M & S.

Stocks such as these are the backbone of our portfolio and remain gifts which keep giving: investments which reward the faithful holder. Accordingly, our few transactions in the period were largely of the routine, portfolio management type: divesting Toyo Tire & taking handsome profits on Diageo and Law Debenture investment trust.

We also purchased a holding of Techtronic, a Hong Kong based pioneer of cordless handheld power tools, marketed worldwide under the Milwaukee, Hoover, Dirt Devil & Ryobi brands, to name a few of its wide portfolio; we expect satisfactory returns in due course, and it provides a good juncture to look at long-term returns.

# AUTHORISED INVESTMENT MANAGER'S REPORT

for the six month period ended 31 March 2023

#### Longer term performance: the twenty-and-a-half-year record

Year	IFSL Hathaway Fund	Benchmark
2002/2022	283.60%	247.50%
2022/2023	8.56%	5.31%
Cumulative	316.43%	265.98%

As the table reflects, our position also remains well ahead of the comparator over the long term. Furthermore, since we started the period higher up the ladder (despite last year's debacle), that margin expanded more: to catch us up in one go, our comparator would need to have produced a performance of 20% in the six months.

Equally, as inflation seems worryingly deep-seated at an annual 10% or so, it is worth noting that, to keep pace with rising prices since 2002, our Accumulation units would now need to be 87p and of course they are 121p ahead of that.

#### <u>Outlook</u>

Meanwhile, the general economy remains wrestling with material inflation and the corresponding interest rate pressures, with labour shortages amid stagnant growth and lower than normal productivity improvements.

Regarding the last of those challenges: possibly too much trust is being placed in the benefits of automation and technology generally; as Robert Solow, the Nobel laureate economist once said, "you can see computers everywhere, except in the productivity statistics".

Equally, Artificial Intelligence (AI) appears hardly the development it is being talked up as being - we are sceptical of the notion that AI software might soon render the human redundant: a standard digital computer is intended to carry out any operations which a human computer can do, and simple electronic calculators neatly illustrate that. They can't decide though, what to calculate, hence AI purports to do just that, using statistical probability and other tools to predict the "working out" that is most likely to be desired.

However, quoting Alan Turing: "a computer would deserve to be called intelligent if it could deceive a human into believing that it was human;" so far, as anyone who has used a "chatbot" will confirm, they fall way short of passing that test.

Equally, even if they were to become that good, finding ever more efficient, perhaps even human-free, ways to do tasks which didn't need to be done in the first place, is not the route to greater productivity.

For investors though, while the general economy is more challenged than a year ago, the stock market is beginning to reflect better things, and the outlook for investors is more promising. We remain comfortable with our commitments and, while a material recovery in our securities is indeed under way, we will continue our quest to find great businesses at prices which make sense.

So, we will not depart from value investing, in our opinion the only rational way to manage securities and, while we do that, unitholders should keep their expectations equally realistic: nothing is sure this week, month or year, indeed is ever certain - whether capital market forecasts or business predictions.

In closing, we again thank IFSL for their accurate administration in the half year and we anticipate the reporting of our annual results in the autumn, while unitholders requiring up to date prices etc., should refer to our website.

Graham Englefield / Graham Shaw CFA Hathaway Investment Management Limited 5 May 2023

# <u>Notes</u>

- 1. "Equities" means quoted shares and "gilts" means UK government bonds; inflation statistics are from the Bank of England; IA means The Investment Association.
- 2. The benchmark is a comparator as to how adroitly the portfolio has been invested over any reasonably long period, the statistic reflecting how a typical conservative private investor's commitments might be constructed, i.e., reflecting our IA cohort (described in the first table).
- 3. The cumulative figures in the second table very accurately show the total return from 25.11.2002 to 31.03.2023. Any discrepancy is due to rounding and is not material.
- 4. "Year" (or "2002/2022" etc.) means the Fund year (or years), i.e., 1 October to 30 September.

## AUTHORISED STATUS

IFSL Hathaway Fund (the Fund) is an authorised unit trust scheme within the meaning of the Financial Services and Markets Act 2000 and is a UCITS scheme operating under the Collective Investment Schemes Sourcebook (COLL) as issued by the Financial Conduct Authority.

#### **GENERAL INFORMATION**

#### Investment objective

The investment objective of the Fund is to grow the value of a unitholder's capital and income, over a period of at least 5 years. This growth is expected to come from a combination of gains in investments held and income received by the Fund - such as bond interest and dividends from shares.

# Investment policy

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when, across different industries and regions of the world.

The Investment Manager considers economic and market conditions, but the focus is on individual company analysis. The aim is to identify companies which show good long-term growth potential, and which appear to be undervalued given their prospects.

The Fund will invest between 40 - 85% of its portfolio in the shares of companies. There will be a bias towards enterprises that are expected to pay steady dividends; however, the Fund may occasionally invest in securities which do not pay dividends.

The Fund will invest between 15 - 60% of its portfolio in bonds, which are loans typically issued by companies, governments and other institutions. These will typically be investment grade bonds, where the issuer has a high and reliable capacity to repay the debt. However, from time to time, our operations may include sub-investment grade bonds (which can be more vulnerable to changing market conditions, but typically pay a higher rate of interest) where we judge them to be incorrectly downgraded.

The Fund may also invest in money market instruments, which are shorter term loans.

The Fund will hold cash to enable the ready settlement of liabilities and for the efficient management of the portfolio. The Fund may hold cash up to a maximum of 30%, in extreme market conditions.

#### Assessing performance

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Mixed investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

## Rights and terms attaching to each unit class

A unit of each class represents a proportional entitlement to the assets of the Fund. The allocation of income and taxation and the rights of each unit in the event the Fund is wound up are on the same proportional basis.

#### Changes in prospectus

There have been no significant changes since the last annual report.

Up to date Key Investor Information Documents, Prospectus and Long Reports and Financial Statements for any fund within the AFM's range, can be requested by the investor at any time.

# DIRECTORS' STATEMENT

This report has been prepared in accordance with the requirements of the Collective Investment Schemes Sourcebook as issued and amended by the Financial Conduct Authority.

<sup>A</sup> The return after charges is calculated using the underlying investments bid prices.

<sup>B</sup> From 30 April 2021, the Operating Charges (or Ongoing Charges Figure) calculation has been extended to include, where relevant, charges incurred by closed-ended vehicles such as investment trusts.

<sup>C</sup> These figures have been annualised

Operating charges are the same as the ongoing charges and are the total expenses paid by each unit class in the period. Direct transaction costs are the total charges for the period, included in the purchase and sale of investments in the portfolio of the Fund. These amounts are expressed as a percentage of the average net asset value over the period and the average units in issue for the pence per unit figures.

# SYNTHETIC RISK AND REWARD INDICATOR (all unit classes)

Lower risk						Higher risk
Typically lower rew	ards				Туріс	ally higher rewards
1	2	3	4	5	6	7

This indicator aims to give you a measure of the price movement of the Fund based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. During the period the synthetic risk and reward indicator has remained unchanged.

# NOTES TO THE INTERIM FINANCIAL STATEMENTS

for the six month period ended 31 March 2023

#### **Basis for preparation**

The interim financial statements have been prepared in compliance with Financial Reporting Standard (FRS) 102 and in accordance with the Statement of Recommended Practice (SORP) for UK Authorised Funds issued by the Investment Management Association (renamed to the Investment Association) in May 2014, and amended in June 2017.

The interim financial statements are prepared in Sterling, which is the functional currency of the Fund. Monetary amounts in these financial statements are rounded to the nearest pound.

The interim financial statements have been prepared on the historical cost convention, modified to include the revaluation of investments and certain financial instruments at fair value.

# Accounting policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 30 September 2022 and are described in those annual financial statements.

The investments of the Fund have been valued at their fair value at 12 noon on 31 March 2023.
