

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MFM Hathaway Fund

(ISIN Income GB0032395336, Accumulation GB0032395443)

This Fund is managed by Marlborough Fund Managers Ltd

Objectives and Investment Policy

The aim of the Fund is to grow the value of a unitholder's capital and income, over a period of at least 5 years. This growth is expected to come from a combination of gains in investments held and income received by the Fund - such as bond interest and dividends from shares.

- The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell, and when, across different industries and regions of the world.
- The Investment Manager considers economic and market conditions, but the focus is on individual company analysis. The aim is to identify companies which show good long-term growth potential, and which appear to be undervalued given their prospects.
- The Fund will invest between 40 - 85% of its portfolio in the shares of companies. There will be a bias towards enterprises that are expected to pay steady dividends; however, the Fund may occasionally invest in securities which do not pay dividends.
- The Fund will invest between 15 - 60% of its portfolio in bonds, which are loans typically issued by companies, governments and other institutions. These will typically be investment grade bonds, where the issuer has a high and reliable capacity to repay the debt. However, from time to time, the portfolio may include sub-investment grade bonds (which can be more vulnerable to changing market

conditions, but typically pay a higher rate of interest) where we judge them to be incorrectly downgraded.

- The Fund may also invest in money market instruments, which are shorter term loans.
- The Fund will hold cash to enable the ready settlement of liabilities and for the efficient management of the portfolio. The Fund may hold cash up to a maximum of 30%, in extreme market conditions.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors' as a way of dividing funds into broad groups with similar characteristics.

The Fund will be included in the IA Mixed Investment 40-85% Shares sector. You may want to assess the Fund's performance compared to the performance of this sector.

The MFM Hathaway Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio is used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

- The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse

factors, including political and economic events.

- The Fund has exposure to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

- When interest rates rise, bond values generally fall. This risk is generally greater for longer term bonds and for bonds with higher credit quality.

- The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of your investment.

- In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner.

A more detailed description of the risks that apply to this Fund can be found in the Fund's prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31/03/2020. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 14 of the Fund's Prospectus, which is available at www.marlbroughfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	1.10%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2019

Past performance is not a guide to future returns.

Performance figures are calculated in Sterling on a bid price basis and include net reinvested income. They include the annual management charge and all other Fund expenses but do not include the entry charge.

The Fund was launched on 25 November 2002.

Benchmark: IA Mixed Investment 40-85% Shares.
